MANAGEMENT DISCUSSION AND ANALYSIS

Management Discussion and Analysis Report as required under the listing agreements with the stock exchanges is enclosed as Annexure 'A'. Certain statements in the 'Management Discussion and Analysis Report' section may be forward looking and are stated as required by applicable laws and regulations. Many factors may affect the actual results, which could be different from what the Directors envisage in terms of the future performance and outlook.

1. INDUSTRY STRUCTURE AND DEVELOPMENT :

- Grape exports from India to Europe is the foremost success story of Indian horticultural exports. India is an important supplier of fresh grapes during the summer months to both Europe and the Middle East markets.
- Over the past few years, new markets such as CIS countries and Far-East have opened up offering alternates and giving the industry a healthy growth prospect. This also reduces the over-dependence of this business on EU and the gulf markets.
- Modern packhouse facilities with forced air cooling systems, APEDA sponsored traceability systems and Internationally qualified chemical residue testing laboratories have all helped the industry grow exponentially by offering fresh Indian grapes with all required food safety controls.
- Indian food and food processing industry has seen significant growth and changes over the past few years, driven by changing trend in markets, consumer segment and regulations. These trends, as well as changing demographics, growing population and rapid urbanization are expected to continue in the future and therefore will shape the demand for value added products in the food processing industry. The food processing sector in India is hence an attractive sector for investment and offers significant growth potential to investors.
- The Indian beverage industry is on a high growth path. Fast urbanisation, growing affluent consumers, changing lifestyles and health considerations are main driving factors behind this growth. The non-alcoholic ready-to-drink beverage market has been recording a compounded annual growth of 13% since 2009 and is one segment that has successfully defied the recessionary trends witnessed almost all across the world and all segments.

2. OPPORTUNITIES AND THREATS:

OPPORTUNITIES

There is a tremendous potential of growth in the exports of grapes from India. Grapes are cultivated over an area of 250 thousand hectares with an annual production of 2629 thousand tones. The phenomenal rise in export of grapes from India has resulted from the fact that India is meeting quality as well as food safety requirements of the importing countries in EU and supplying at competitive prices. Currently more than 80 percent of the produce is used for table purposes. There is a need to diversify and add value through processing as juice and concentrates as these products are still imported.

- Demand for processed food has been rising with growing disposable income, urbanisation, young population and nuclear families.
- Household consumption is set to double by 2020.
- India benefits from a large agriculture sector, abundant livestock, and cost competitiveness.
- Investment opportunities are coming up in agriculture, food infrastructure, and contract farming.
- Potential global outsourcing hub - Global supermarket majors are looking at India as a major outsourcing hub, India enjoys favorable supply-side fundamentals (abundant raw materials supply, cost advantages, The government is helping by supporting investments in AEZs, mega food parks and easier credit.

- The food processing industry has the ability to convert raw agricultural produces into products with much longer shelf life resulting in reduction of wastages. This also reduces the threat of the temporary “problem of plenty” at harvest time for farmers thus giving them confidence to increase production.
- Priority sector status for agro-processing given by the central Government
- Vast domestic market
- Large crop and material base offering a vast potential for agro processing activities
- Setting of SEZ/AEZ and food parks for providing added incentive to develop greenfield projects.
- Opening of global markets – there are still several un-tapped markets around the world which can significantly fuel growth for the next several years.

THREATS

- Lack of suitable infrastructure in terms of cold storage, warehousing, etc.
- Lack of adequate quality control and testing infrastructure
- Inefficient supply chain and involvement of middlemen
- High inventory carrying cost
- High packaging cost
- Affordability and cultural preference of fresh food
- Non-tariff barriers imposed by countries with potential for market
- Private standards imposed by large retailers in developed markets

3. SEGMENT WISE PERFORMANCE :

- The Company has identified following segments as reportable segments:
- 1) Fresh Fruits
- 2) Food Processing
- Details of Segment wise performance are given at respective place of in this report.

4. RECENT TRENDS AND FUTURE OUTLOOK :

The food processing industry provides vital linkages and synergies between industry and agriculture. The Food Processing Industry sector in India is one of the largest in terms of production, consumption, export and growth prospects. The government has accorded it a high priority, with a number of fiscal reliefs and incentives, to encourage commercialization and value addition to agricultural produce, for minimizing pre/post-harvest wastage, generating employment and export growth. India's food processing sector covers a wide range of fruits and vegetables.

Indian food processing industry is widely recognized as a ‘sunrise industry’ having huge potential for uplifting agricultural economy, creation of large scale processed food manufacturing and food chain facilities, and the resultant generation of employment and export earnings. Over the last few years, there has been a positive growth in ready-to-serve beverages, fruit juices and pulps, dehydrated and frozen fruits and vegetable products, tomato products, convenience vegspice pastes, reasons being increase in consumption by nuclear families, working women, students and single employees staying alone. An increasing acceptance of new products with market development efforts has been witnessed lately given the fact that there is a good international demand for certain fruits and vegetable products. The Indian food processing industry is primarily export oriented. India's geographical situation gives it the unique advantage of connectivity to Europe, the Middle East and the far-east.

5. RISKS AND CONCERN :

The most crucial challenge that the Indian food and food processing industry is facing as of today, is the lack of suitable infrastructure in the shape of cold chain, packaging centres, value added centres, etc.

Grape is one such crop that is highly sensitive to climatic changes. There are certain critical/sensitive phases like bud- break, bloom and harvest. As majority of the grape growing vineyards in India are located in semi-arid tropics, the problems of irrigation water availability and salinity are already a serious issue which will get aggravated due to climate change.

Urbanization and infrastructure development are major factors which are responsible for faster shrinkage in cultivable land. Change in land utilization pattern also decides availability of land for grape growing. The effect of climate change may open up other sites for grape growing than existing. Same way grape cultivation may have to be extended to unconventional and marginal land areas. Developing varieties and production/protection technologies for such regions will be a research challenge in coming decades.

6. INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY :

The Company has adequate Internal control systems commensurate with its size and operations to ensure orderly and efficient conduct of business while safeguarding the assets, quality, safety, procurements, finance and accounts and reducing and detecting error.

7. FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFORMANCE :

The financial performance of the Company is described in the Director's Report under the head "Financial Results" and "Review of Operations".

8. MATERIAL DEVELOPMENT IN HUMAN RESOURCES AND INDUSTRIAL RELATIONS FRONT :

The Company routinely undertakes employee development activities keeping in mind the professional requirements of the employees as well as the growth of the Company.

The Company has embarked on the path to formalize its CSR commitments – and is perhaps the only company in India in the fresh produce export sector to move in this direction. This is not only going to result in better integration within the supply chain but also offer a significant competitive edge in marketing our products in the developed markets across the world.

The Industrial Relations were cordial throughout the year with no incidence of strike or lockouts.

CAUTIONARY NOTE

Statements in the Management Discussion and Analysis describing the Company's objectives, projections, estimates, expectations and others may constitute "forward-looking statements" within the meaning of applicable securities laws and regulations. Actual results may differ from those expressed or implied. Several factors that could significantly impact the Company's operations include economic conditions affecting demand, supply and price conditions in the domestic and overseas markets, changes in the Government regulations, tax laws and other statutes, climatic conditions and such incidental factors over which the Company does not have any direct control.

The Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED 31.03.2014**1 Significant Accounting Policies :****1.1 Basis of Preparation of Financial Statements****a) Basis of Accounting**

The financial statements of the Company are prepared under the historical cost convention as a going concern on accrual basis and to comply in all material aspects with the Accounting Standards prescribed in the Companies (Accounting Standards) Rules, 2006 issued by the Central Government, the relevant provisions of the Companies Act, 1956 ("the Act") which as per clarification issued by the Ministry of Corporate Affairs continue to apply under Section 133 of the Companies Act, 2013 (which has superseded Section 211(3C) of the Act w.e.f 12th September 2013) and other accounting principles generally accepted in India, to the extent applicable.

b) Use of Estimates

The preparation of financial statements in conformity with Generally Accepted Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses and disclosure of contingent assets and liabilities. The estimates and assumptions used in the accompanying financial statements are based upon management evaluation of the relevant facts and circumstances as on the date of the financial statements. Actual results may differ from the estimates and assumptions used in preparing the accompanying financial statements. Any revisions to accounting estimates are recognised prospectively in current and future periods.

c) Current / Non Current Classification

All assets and liabilities have been classified as current and non-current as per the Company's normal operating cycle and other criteria set out in the Schedule VI of the Companies Act, 1956. Based on the nature of products and services and their realization in cash and cash equivalents. The Company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of asset and liabilities.

d) Change In Accounting Policy

Government grants related to depreciable fixed assets was treated as deferred income which was recognised in the statement of profit and loss on a systematic and rational basis over the useful life of the asset. During the year the Company has changed the method of recognizing the government grant. Grants related to specific fixed assets are presented in balance sheet by showing the grant as a deduction from the gross value of the assets concerned in arriving at their book value. Thus grant is recognised in the statement of profit and loss over the useful life of a depreciable asset by way of a reduced depreciation charge. This change results in more appropriate preparation and presentation financial statement of the Company.

Accordingly, Gross Block of Fixed Assets was reduced by Rs. 8,97,01,000/- being grant received by the company. Out of which grant of Rs.1,71,03,774/- was written off as deferred Government grant in proportion of depreciation in earlier years & which is adjusted in respective assets & depreciation fund accounts. The change is revenue neutral in the statement of profit and loss account.

1.2 Fixed Assets and Depreciation / Amortization**a) Tangible Fixed Assets**

Fixed Assets are stated at cost of acquisition/construction (net of recoverable taxes) less Accumulated Depreciation and impairment loss if any. Cost of acquisition includes non refundable taxes, duties, freight and other costs that are directly attributable to bringing assets to their working condition for their intended use. All costs, including financing costs till the asset is put to use and adjustments arising from exchange rate variations attributable to the fixed assets are capitalized.

Depreciation on tangible fixed assets is provided on Straight line method on pro-rata basis at rates and in manner specified in Schedule XIV of the Companies Act, 1956.

b) Intangible Assets

Intangible assets are recognized when it is probable that the future economic benefits that are attributable to the assets will flow to enterprise and the cost of the assets can be measured reliably. The intangible assets are recorded at the consideration paid for the acquisition of such assets and

are carried at cost less accumulated amortization and accumulated impairment loss, if any.

Costs incurred on acquisition of intangible assets are capitalized and amortized on a straight-line basis over their technically assessed useful lives, as mentioned below :

Intangible Assets	Estimated Useful Lives (Years)
Website	5

c) **Capital Work in Progress & Capital Advances**

Cost of Assets not ready for intended use, as on the balance sheet date, is shown as capital work in progress. Advances given towards acquisition of fixed assets outstanding at each balance sheet date are disclosed as Long Term Loans & Advances.

d) **Impairment**

At each balance sheet date, the management reviews the carrying amounts of its assets included in each cash generating unit to determine whether there is any indication that those assets were impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment. Recoverable amount is the higher of an asset's net selling price and value in use. In assessing value in use, the estimated future cash flows expected from the continuing use of the asset and from its disposal are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of time value of money and the risks specific to the asset.

Reversal of impairment loss is recognised as income in the statement of profit and loss.

1.3 Investments

Investments are classified into current and long-term investments. Investments that are readily realizable and intended to be held for not more than a year from the date of acquisition are classified as current investments. All other investments are classified as long-term investments. However, that part of long term investments which are expected to be realized within twelve months from Balance Sheet date is also presented under "Current Assets" under "Current portion of long term investments" in consonance with the current / non-current classification of revised Schedule VI to the Companies Act, 1956.

Current investments are stated at the lower of cost and fair value. The comparison of cost and fair value is done separately in respect of each category of investments.

Long-term investments are stated at cost. A provision for diminution in the value of long-term investments is made only if such a decline is other than temporary in the opinion of the management.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is recognised in the Statement of Profit and Loss.

1.4 Inventories

Inventories which comprise raw materials, work-in-progress; finished goods, and stores and spares are carried at the lower of cost and net realizable value. Cost of inventories comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on First-in-First-out (FIFO) basis. In the case of manufactured inventories and work in progress, cost includes direct material and labour cost and a proportion of manufacturing overheads. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale. The net realizable value of work-in-progress is determined with reference to the selling prices of related finished products. Raw materials and other supplies held for use in the production of finished products are not written down below cost except in cases where material prices have declined and it is estimated that the cost of the finished products will exceed their net realizable value. The comparison of cost and net realizable value is made on class of item. Excise duty is included in the value of Finished Products, wherever applicable. Materials-in-transit are valued at cost-to-date.

1.5 Transactions in Foreign Currency:

a) **Initial recognition:**

- b) Post Employment Benefit

Defined Contribution Plans :

A defined contribution plan is a post-employment benefit plan under which an entity pays specified contributions to a separate entity and has no obligation to pay any further amounts. The Company makes specified monthly contributions towards employee provident fund to Government administered provident fund scheme and Employees' State Insurance Corporation (ESIC) which are a defined

contribution plan. The Company's contribution is recognised as an expense in the Statement of Profit and Loss during the period in which the employee renders the related service.

Defined Benefit Plans :

The Company's gratuity benefit scheme is a defined benefit plan. The Company's net obligation in respect of a defined benefit plan is calculated by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value. Any unrecognized past service costs and the fair value of any plan assets are deducted. The calculation of the Company's obligation under the plan is performed annually by a qualified actuary using the projected unit credit method, which recognizes each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation. The discount rates used for determining the present value of the obligation under defined benefit plan, are based on the market yields on Government securities as at the Balance sheet date.

The Company recognizes all actuarial gains and losses arising from defined benefit plans immediately in the Statement of Profit and Loss. All expenses related to defined benefit plans are recognised in employee benefits expense in the Statement of Profit and Loss. The Company recognizes gains and losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs.

A contingent liability exists when there is a possible but not probable obligation or a present obligation that may, but probably will not, require an outflow of resources, or a present obligation whose amount cannot be estimated reliably. Contingent liabilities do not warrant provisions, but are disclosed unless the possibility of outflow of resources is remote. Contingent assets are neither recognised nor disclosed in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an inflow of economic benefits will arise, the asset and related income are recognised in the period in which the change occurs.

The credit available under the said act in respect of MAT is recognized as an asset only when there is certainty that the company will pay income tax in future periods and MAT credit can be carried forward to set-off against the normal tax liability.
